# Welcome to myshop.com[#](#)

myshop.com unique service enables you to start your own shop quickly (B2C and B2B) on the Internet, where your customers can view and order products. If you already have your own website, myshop.com is easily integrated into your site.

What are the criteria for a web shop? It should be :

- User friendly
- No restrictions on layout
- No restrictions on the number of data to be shown or searched
- Links to other systems

myshop.com is unique in offering all the above and it offers you seamless links to Excel or your own database.

## Links[#](#)

myshop.com set up is an entirely new concept. You are able to manage everything off-line using your own spreadsheet software. Most people use Excel, but other programs are compatible as well. Besides the link to spreadsheets we also offer links to your own database and /or your own order system.As myshop.com is compatible with your software, the learning process is kept short and you will be extremely flexible.

## Your own layout[#](#)

myshop.com is very easy to integrate into your own site. There are numerous possibilities in myshop.com, which will not interfere with your creative layout .

You should regard myshop.com as the engine of a car designed by you and it is you who decides on the car's exterior. The integration process is done by means of myshop.com templates and /or your own design with for instance Macromedia Dreamweaver or any other (X)HTML editor.

## Good luck[#](#)

Good luck in setting up your own web shop. We hope this manual will answer all your questions. Should you need more information, please contact us at support@myshop.com.
